

For over 30 years, Top Master is the company Kansas City homeowners have turned to to create the style they crave. Offering a wide selection of countertop products including granite, soapstone, solid surface, quartz, and even exotic woods, Top Master is the

largest fabricator of countertops in the Kansas City area.

With these luxurious materials and their first-rate fabrication craftsmanship at the top of the priority list, Top Master brings beautiful design into your home. With locations in 17 states, their knowledgeable and experienced employees are truly the experts in the countertop field.

“When choosing a countertop, it’s important to trust the experts,” says President Mike Varone. “As a wholesale fabricator and installer, we partner with the best trade professionals who can help you with your next countertop project. If you are interested in remodeling or building, we ask you to visit any one of

the talented and qualified professionals we work with. They can help you design the

perfect chef’s kitchen, turn up the heat on stylish laundry room design or design the master bathroom of your dreams. From color selections to educating you on the features and benefits of a product, they are the experts.”

Incorporating the latest advancements in technology and use of state-of-the-art digital equipment, countertops can be measured accurately and made to fit the customer’s kitchen, bath, outdoor living area, or garage perfectly; the first time around. This adds to the exceptional client satisfaction Top Master is known for.

When choosing a specific material for a countertop, it’s really all about the homeowner’s lifestyle. As trends change, Top Master remains at the forefront in

offering the most popular materials while assuring their quality. One of the hottest recent trends has been quartz.

“We have seen a big trend in quartz over the last couple of years,” shared Varone. “Also known as engineered stone, natural quartz countertops are 93% mined quartz crystals, giving them a natural depth and radiance without imperfections, cracks or irregularities. It’s an ideal material for high-traffic applications. Quartz comes in many vibrant colors and styles that mimic

granite and marble. People love the look of marble but it’s not the best product for your kitchen.”

Whichever material and style you select, Top Master aspires to create the style that fits you and your home. Their reputation speaks for itself. ■

Don't be afraid to take a risk and play with new color in your home. Think uniqueness – pops of brilliant blues and dazzling purples. It's more of a work of art. Personalization is not black or white; it's a blurring of individual experiences and backgrounds that emerge when a space begins with a stunning foundation.
