

DESIGNERS OF BACKYARD FUN! Looking to add more fun to your backyard experience this summer? Look no further than Aqua Blue Designs, expert

But how can this be? Simply put: fiberglass pools are the most advanced, high-tech pools in the industry. The number one trend is fiberglass pools because you can't

the overall longevity of what could be your favorite part of your home. Owner Norm Whitted can attest that Aqua Blue Designs only believes in fiberglass pools because that is all they've ever done, and they're "easy to maintain and take care of."

"We take pride in giving families an enjoyable time together without the work of a traditional swimming pool," Whitted said. "I hear people talk about how they don't want a traditional swimming pool because of all the work, but we use materials and systems that minimize the amount of work it takes to enjoy your pool. We utilize the best materials and systems that improve our products year after year."

Start to finish, you could be swimming in your backyard in as little as a month, depending on what features you decide to include in your fiberglass pool.

"The time we start to finish a job averages 5 or 6 weeks," Whitted commented. "Fiberglass pools are faster to install than regular pools because the pool itself is made in a factory. There's some

pool designers who have been in the business for 19 years. In that time, this company has installed over 300 fiberglass pools to be enjoyed for decades to come.

go wrong with 30 minutes of maintenance a week, zero long-term maintenance like painting or plaster repairs or liner replacements on other types of pools, and

preparation, then we install the pool, lighting, water features, decking, filtration system and any other required structures.

Speaking of features, Aqua Blue Designs provides options for the following:

- Tanning ledges
- Beach entries
- Sitting areas
- Built in spas and steps
- Sunken living rooms
- And more!

Want to know more about "sunken living rooms"? Check out thursdaypools.com and see all the possibilities – including having a fire pit *within* your pool! Imagine

relaxing in the middle of your pool on a star-filled sky night and having your fire pit glowing and crackling while your friends are swimming by. What a wonderful way to spend an evening.

But it's not just the pools that should make Aqua Blue Designs your first choice, it's their modern-day technology for sanitation, filtration and chemical automation.

"Over a 10 or 15 year period, fiberglass pools will cost you a fraction of the cost of other pools," Whitted shared. "They will maintain their quality almost

forever. If I could say one sentence about our company, it's that we have the latest technology – filtration systems, sanitation and pool materials. We only install the best on the market." ■

PRO TIP...

Adding decorative concrete to the pool area helps it look natural and adds to the beauty of your backyard living area.
